NEW IDEAS IN PSYCHOLOGY

An International Journal of Innovative Theory in Psychology

Founding Editor: **Pierre Moessinger**, *University of Geneva, Switzerland*
Editors: **Richard F. Kitchener**, *Department of Philosophy, Colorado State University, Fort Collins, CO 80523, USA* **Benny Shanon**, *Department of Psychology, The Hebrew University, Jerusalem, Israel*

Audience: Psychologists, Sociologists, Philosophers and Social Scientists.

AIMS AND SCOPE
There is a growing dissatisfaction with fragmentation in theoretical psychology and without doubt there is a felt need for a journal containing articles which aim to integrate these fragmented ideas and theories. Since the usual methods and perspectives have failed to achieve such integration, common sense suggests that we try new and more daring hypotheses. We place particular emphasis on the fact that informed discussion of psychological theories needs to be interdisciplinary. We also anticipate that fresh ideas may come from research in the fields directly related to psychology. *New Ideas in Psychology* acts as a forum for theorizers striving to integrate the fragmented ideas and theories currently found in theoretical psychology. It is anticipated that fresh ideas may come from research in fields indirectly related to psychology. *New Ideas in Psychology* provides a forum for theorizers. It is open to letters, comments or debate, and puts a special emphasis on seminal and controversial ideas. Empirical papers are welcome, but only as long as they focus on conceptual issues and are theoretically creative.

BEHAVIOUR RESEARCH AND THERAPY

Incorporating Behavioral Assessment

An International Multi-Disciplinary Journal

Editor-in-Chief: **S. Rachman**, *Department of Psychology, University of British Columbia, Vancouver, British Columbia, Canada*

(00265)
1995: Volume 33 (8 issues)
Associated Personal price: **£108.00 (US$161.00)** Subscription price: **£370.00 (US$552.00)**
ISSN 0005-7967
Audience: Clinical Psychologists, Psychiatrists, Psychotherapists, Psychoanalysists, Social Workers, Counsellors, Medical Psychologists, Cognitive Psychologists.

AIMS AND SCOPE
The journal publishes scientific papers pertaining to abnormal behaviour and experiences, and their modification, and to medical psychology. The assessment of abnormal behaviour and experiences, and how they change and under what conditions, has always been within the scope of *Behaviour Research and Therapy*, and we have now incorporated *Behavioral Assessment*. Approximately one-quarter of this expanded journal is devoted specifically to assessment. In keeping with the important scientific and clinical developments of the past few years, the scope of the journal includes work on behavioural medicine/medical psychology. Articles on these subjects are welcomed.

LEARNING AND INSTRUCTION

The Journal of the European Association for Research on Learning and Instruction (EARLI)

Editor: **Roger Säljö**, *Department of Communication Studies, University of Linköping, S-581 83, Linköping, Sweden*

Audience: Educational Psychologists, Developmental Psychologists, Cognitive Psychologists, Educational Researchers.

AIMS AND SCOPE

Learning and Instruction is an international, multi-disciplinary journal that provides a platform for the publication of the most advanced high-quality research in the areas of learning, development, instruction and teaching.

The journal welcomes several types of contributions: reports of original empirical investigations, and replications or extensions of important previous work; critical, integrative theoretical and methodological contributions; synthetic review articles. A preference, however, will be given to empirically-based studies.

The papers may represent a variety of theoretical perspectives and different methodological approaches (quantitative as well as qualitative). They may relate to any age level - from infants to adults - and to a diversity of settings, such as classroom learning in school, learning environments for special educational needs, vocational and industrial training of various kinds, and informal educational settings.

The focus will be on European work in the field. However, contributions from non-European experts as well as non-members of the European Association for Research on Learning and Instruction are encouraged.

The major criteria in the review and the selection process are the importance of the contribution to the area of learning and instruction, as well as its technical quality. The aim of *Learning and Instruction* is to provide a high quality, peer refereed journal publishing the most advanced research on learning and instruction.
